

Claims: I claim:

1. This vehicle is a two in one unique design that holds various items, which tilts upward and is pulled with a handle and rolls on two wheels, referred to as cart, upon arrival items are unloaded and vehicle sits on legs, and handle retracts for using as a comfortable seat, referred to as chair.
 - a. The vehicle of claim 1 wherein said cart is designed to hold beach accessories inside attached fabric, with handle that extends to allow for pulling when in a standing position causing said cart to tilt upward still allowing accessories to remain inside, then when walking the sand tires allow movement across deep sand and rough terrain with ease, upon arrival at destination accessories are removed.
 - b. The vehicle of claim 1 wherein said chair when tilted downward allows tires to elevate and it sits on attached legs, then retractable handle is pushed in to allow a person to sit onto attached fabric to make for a comfortable seat.
 - c. The vehicle of claim 1 wherein said handle extends which is limited by a strap allows pulling of said cart by pushing handle in the handle slides into the frame while strap folds down allowing handle to retract to sit in said chair.
